

UltraJoint™

Enclosed Metal Bellows Expansion Joint

We built a better expansion joint for your building needs.

UltraJoint's patented design simplifies any pipe expansion project!

With UltraJoint™ you can eliminate the installation of two pipe guides for every metal bellows joint installed significantly reducing installation costs.

- **ECONOMICAL** – Eliminates guides for every UltraJoint
- **PROTECTS OVER-TRAVEL** – Built in travel limit assembly assures safety & performance
- **LARGE MOVEMENTS** – Absorbing axial pipe movements up to 3.25"
- **EASY TO INSULATE** – Simply wrap insulation over shroud
- **PIPE GUIDE SHROUD** – Encapsulated design protects from external impact & functions as a safety shield
- **HIGH WORKING PRESSURE** – Standard design working pressure to 300psi, test pressures 1.5xs
- **MULTIPLE FITTINGS AVAILABLE** – Grooved ends, welded ends and 150# and 300# flanges
- **Standard Sizes 2" to 24" I.D.**
